Speed Up Your Coin Processing

SCAN COIN

Do you need to speed up your coin processing while keeping it totally accurate? With this machine you get the highest possible accuracy in counting, sorting and batching. You can even off-sort counterfeit, foreign and damaged coins accurately and in record time. No time-wasting, no extra energy, no extra expense required. Total efficiency. And it is easy to operate.

Accuracy in action

Apart from being a fast worker, the SORTOVIT is renowned for having the highest possible accuracy in counting, sorting and batching. It is also exceptionally accurate for off-sorting counterfeit, foreign and damaged coins.

Quickrail®

Like any other coin sorter, the SORTOVIT is equipped with Quickrail® – a fast-change sorting track. It can be changed in next to no time and minimum maintenance is required.

Desktop Efficiency

The SORTOVIT is designed for desktop use. There is no need for space-consuming stands or special furniture. Just place it where it suits you best and from day one the SORTOVIT is a convenient working partner.

Technical Specification

Weight	57 Kg
Dimensions (W x D x H)	1,008 x 367 x 306 mm 1,008 x 413 x 306 mm (Including outlets)
Voltage	230 V/50 Hz, 115 V/60 Hz
Power	approx. 200 VA
Speed	up to 2,500 coins/min.
Diameter	16.1-31.0 mm (standard), special diameters on request
Thickness	1.0-3.2 mm (standard)

The SORTOVIT can be equipped with different Coin lifts

Flexible Choices

There is one serial port allowing the machine to send count data to a serial printer or to communicate with a variety of external systems including direct data transfer to PC networks and central accounting systems.

Easy Operation

The SORTOVIT is easily operated from a clear and logical display – designed to perfectly suit the needs of the operator. It has a large coin tray with high capacity. Other design benefits include an automatic coin feed and a cover for noise reduction and dust prevention.

Multi-Stop Capacity

The sorter features multi-stop capacity, meaning that several denominations can be packed into bags or tubes in one step, eliminating unnecessary stops for packing after the coins has been sorted. The amount of each batch can be defined and preprogrammed to match the needs of all users.

The solution could also be equipped with a wide range of Coin lifts for feeding the coins into the sorter in a continues and efficient way.

Sorting mode of up to nine denominations

Extra door for using coin tubes

Clear and user-friendly display

Connected to the unique monitoring software solution

Superior financial and operational control

The counter works seamlessly with the unique Cash Center processing solution, Connect Cash. The management platform offers you superior financial and operational control of cash and brings the very most out of your new counter. Maximize the value of your business and benefit from best-in-class cash handling technology and system.
